Studies

Curriculum

2014–2017 **High school (science section)**
LYCEE TURGOT · Paris

2017–2019 **Preparatory classes**
LYCEE SAINT LOUIS · Paris
MPSI and MP* classes

2019–2020 **Bachelor of Mathematics**
UNIVERSITE LYON 1 · Lyon

2019–2023 **Bachelor and Master of Computer Science**
ENS DE LYON · Lyon

2023–2026 **PhD in computer science**
LABRI, UNIVERSITE DE BORDEAUX · Bordeaux

Diplomas

2017 **Baccalauréat S**
SPE MATHS · Lycée Turgot, Paris

2020 **Mathematics**
BACHELOR · Université Lyon 1

2022 **Fondamentals of computer science**
MASTER · ENS de Lyon

Skills and experience

Languages

French	mother tongue
English	fluent (CAE grade A)
German	B1 level
Italian	B1 level

Research internships

L3	with Binh-Minh Bui-Xuan
M1	with Paul Wollan
M2	with Marthe Bonamy and Alexandra Wesolek
PLR1	with Mathieu Mari and Michał Pilipczuk
PLR2	with Jukka Suomela

Coding languages

Python · C++ · OCaml · OpenGL

Publications

2026

- **A Polynomial Bound on the Pathwidth of Graphs Edge-Coverable by k Shortest Paths**, *STACS 2026*, with Julien Baste, Lucas de Meyer, Ugo Giocanti, and Étienne Objois. [arXiv version, publisher's version]
- **Testing H-Freeness on Sparse Graphs, the Case of Bounded Expansion**, *STACS 2026*, with Samuel Humeau, Mamadou Moustapha Kanté, Daniel Mock, and Alexandre Vigny. [arXiv version, publisher's version]

2025

- **Local Constant Approximation for Dominating Set on Graphs Excluding Large Minors**, *PODC 2025*, with Marthe Bonamy, Cyril Gavoille and Alexandra Wesolek. [arXiv version, publisher's version]
- **Induced Disjoint Paths Without an Induced Minor**, *ICALP 2025*, with Pierre Aboulker, Édouard Bonnet, and Nicolas Trotignon. [arXiv version, publisher's version]

2024

- **Distributed Binary Labeling Problems in High-Degree Graphs**, *SIROCCO 2024*, with Henrik Lievonen and Jukka Suomela. [arXiv version, publisher version]

2023

- **Brief Announcement : Distributed Derandomization Revisited**, *DISC 2023*, with Sameep Dahal, Francesco D'Amore, Henrik Lievonen and Jukka Suomela. [arXiv version, publisher's version]
- **A parameterized approximation scheme for Geometric Knapsack problem with wide items**, *IPEC 2023*, with Mathieu Mari and Michal Pilipczuk. [arXiv version, publisher version]

2021

- **Temporal Matching on Geometric Graph Data**, *CIAC 2021*, with Ngoc-Trung Nguyen and Binh-Minh Bui-Xuan. [HAL version, publisher's version]

Teaching

Institut d'Optique d'Aquitaine

- Programmation 3D, *2024-2026*.
- Programmation C++, *2024-2026*.
- Suivi de projets M1, *2024-2025*.
- Programmation MatLab, *2025-2026*.

IUT de Bordeaux

- Algorithms and data structures, *2023-2024*.
- Java and C++ programming projects, *2023-2024*.

Talks

2025

- **Local Constant Approximation for Dominating Set on Graphs Excluding Large Minors**, at *PODC 2025* and *AlgoDist seminar, LaBRI, Bordeaux*.
- **Induced Disjoint Paths Without an Induced Minor**, at *ICALP 2025* and *JGAs 2025*.

2024

- **Asymptotic dimension, distributed algorithms, and local graph concepts**, at *Graph Theory Seminar, Pilsen*.
- **Algorithmes distribués et dimension asymptotique**, at *JGAs 2024*.
- **Locally finding dominating sets in $K_{2,t}$-minor-free graphs**, at *Discrete Mathematics Seminar, TU Berlin*.

2023

- **Brief Announcement : Distributed Derandomization Revisited**, at *DISC 2023* and *AlgoDist seminar, LaBRI, Bordeaux*.
- **A parameterized approximation scheme for the 2D-Knapsack problem with wide items**, at *IPEC 2023* and *AlGCo seminar, LIRMM, Montpellier*.
- **Locally finding dominating sets in $K_{2,t}$-minor-free graphs**, at *MIMUW seminar, Warsaw*, *AlGCo seminar, LIRMM, Montpellier*, and *JGA 2023*.

2022

- **Locally approximating dominating sets in $K_{2,t}$-minor-free graphs**, at *GO seminar, LaBRI, Bordeaux*.

2021

- **Temporal Matching on Geometric Graph Data**, at *CIAC 2021*.

2020

- **Couplage temporel et géométrique**, at *JGAs 2020*.

Hobbies

Competitive programming (2nd at TRACS 2019, Prologin 2020 finalist)

Chess

Hiking, bouldering, diving

Music, piano, composition

Traveling
